Company Overview

Frontier Bolt Company of Texas was founded in 1981 as a source for large diameter Grade 8 Bolts. Since it's inception it has grown to cover a whole host of capabilities including Structural Steel Products, Metal Component Manufacturing, Machined Parts as well as Standard and Non-Standard Fasteners. By servicing such industries as Oil Field, Pipeline, Commercial Construction, Agricultural, Highway Construction, Manufacturing, Tower, and Electrical Frontier Bolt has built a reputation as a company that will meet or exceed customer expectations on Service and Delivery.

Service Policy

Frontier Bolt maintains a service oriented mentality that our customers are our greatest asset. We achieve this by learning everything we can about our customers needs so as to provide them the best service possible. It starts with the owner of our company, Rick Ford, and his belief that we should never have to apologize for poor quality or service. When you come to Frontier Bolt you will know that you are getting the attention to detail that your company deserves.

Manufacturing Capabilities

Frontier Bolt has over 35 years of experience in machining and manufacturing steel products for its customers. Utilizing highly trained personnel Frontier Bolt is a leader in the manufacturing industry producing parts to your EXACT specifications. Our manufacturing capabilities include:

Structural Steel Fabrication
